

# Transformer and Circuit Breaker Leak Sealing Services

**Oil – Nitrogen – SF6 Gas leaks sealed without draining or depressurizing your apparatus. Lower unit repairs completed while energized.**

*“We’ve worked closely with Colt Power Services since 2005 for our leak repair needs. They are extremely responsive and perform top quality work. We count on their outstanding service and support.”*

Tony Picagli, United Illuminating, Shelton, CT

**Colt’s technicians have over 10 years of specialized experience sealing leaks in electrical apparatus. We have completed over 11,000 repairs to date.**

**Typical repairs include, but are not limited to:**

- Cover Plates
- Cracked Valves
- CT or Junction Blocks
- Drain Valves & Connections
- Expansion Joints
- Flanged & Threaded Connections
- Flapper Valve Packings & Flanges
- Insulator Bushings/Variou
- Manway Covers
- Pressure, Temperature, and Level Gauges
- Pump Flanges & Packings
- Radiator Fins
- Tap Changer Covers, Switch Packings & Flanges
- Tubing Connections
- Welds

Repairs are completed using our Drill and Tap technique or custom-designed and fabricated clamps and enclosures. Our sealant has been specially formulated for electric apparatus and allows for movement due to vibration and temperature changes.

**If oil or gas is leaking, air and moisture are seeping in!**  
Contact Colt today for a no-obligation leak survey and proposal.
